Ron and Eric did there's last Friday...its not a big deal...you kinda just go into her office and chat it up....

Eric & Ron provided feedback on the work they do and in some cases she knew which projects she would work w/ them on, so like Eric – Reg Det 3 so they talked about the project...its more like a greet and meet...no expectation....

I have a “getting acquainted” meeting with Becki at 2:30, what does that mean?

**Subject:** FW: What are the Programmatic Implications of the WVA spill

**Good Afternoon:**

**In preparation for the meeting that Nancy is hosting next week with the OD's regarding the W.VA spill, she would like us to develop a one pager to be shared before the meeting (see more details below).**

**We have a lot of information to put a one pager together but I wanted to ask and see what our overall approach would be.**

# Ex. 5 - Deliberative

If we agree w/ this approach I can draft a one pager for all to review but want to make sure I have an idea as to how we want to address it.

I know that the main point is our authority would not have prevented this because we can't do the O&M of a chemical facility but I think the goal is for us to develop something within our authority.

Welcome your comments/edits/suggestions..thanks.

**Subject:** What are the Programmatic Implications of the WVA spill

Hi all,

I checked in briefly with Nancy about her expectations for this meeting that's scheduled for next week Thursday. She is interested in getting a better understanding of what could be done to prevent a spill like this from occurring. To that end, she would like to focus the discussion on the existing regulatory gaps that were highlighted by the occurrence of this spill, and what are some of the implications for OW's programs. She would like for each program to develop a one pager that would be shared among the group beforehand and could be discussed during the meeting on Thursday.

Right now, OWOW is not currently on the invitation because it isn't clear that their program would play a specific role in the WVA situation. But they may be added later.

Please let me know if you have any questions.

Thanks!

Nizanna
